

## Could we be Your partner in metal recycling?

Eurajoen Romu Oy was founded in 1994 and is a company that specialises in recycling of metals. Our customer-oriented mode of operation has allowed us to grow into one of the largest privately-owned operators in the field of metal recycling in Finland. International trade allows us to offer competitive pricing on all recyclable metals. We have more than 400 business clients!

Our operations are guided by the ISO 9001 quality management system and the ISO 14001 environmental management system. As a testament to this Finnish foundry and steelworks industries have elected Eurajoen Romu Oy as recycled steel supplier of the year from over 300 candidates.

In addition to savings we offer our clients personalised recycling solutions.

- The best recycling containers are chosen from our wide-ranging collection, or we can also design suitable containers customised according to the needs of the client. For example, lockable containers are a recent trend.
- The possibility of real-time monitoring of stock. When a load arrives, a weighing receipt is delivered to the client by fax or email.
- Payment transactions are planned according to the client's desired model.
- Emptying of platforms can be arranged to be automatic or if the customer wishes, they may order an emptying by fax, email, telephone call or by SMS.
- We instruct our clients on sorting materials in a financially sound manner. It is most economic to sort the recyclables as soon as they come into about.

We are constantly improving our customer service in co-operation with our clients. We aim to provide a replete service of high quality to our customers so they don't need to waste time on issues that are our profession.

We will gladly answer any and all questions!

Hoping for future cooperation,

*Satu Hallinen*
